

NLAS7242

High-Speed USB 2.0 (480 Mbps) DPDT Switches

The NLAS7242 is a DPDT switch optimized for high-speed USB 2.0 applications within portable systems. It features ultra-low on capacitance, $C_{ON} = 7.5$ pF (typ), and a bandwidth above 900 MHz. It is optimized for applications that use a single USB interface connector to route multiple signal types. The C_{ON} and R_{ON} of both channels are suitably low to allow the NLAS7242 to pass any speed USB data or audio signals going to a moderately resistive terminal such as an external headset. The device is offered in a UQFN10 1.4 mm x 1.8 mm package.

Features

- Optimized Flow-Through Pinout
- R_{ON} : 5.5 Ω Typ @ $V_{CC} = 4.2$ V
- C_{ON} : 7.5 pF Typ @ $V_{CC} = 3.3$ V
- V_{CC} Range: 1.65 V to 4.5 V
- Typical Bandwidth: 900 MHz
- 1.4 mm x 1.8 mm x 0.50 mm UQFN10
- OVT on Common Signal Pins D+/D- up to 5.25 V
- 8 kV HBM ESD Protection on All Pins
- This is a Pb-Free Device

Typical Applications

- High Speed USB 2.0 Data
- Mobile Phones
- Portable Devices

Figure 4. t_{ON}/t_{OFF}

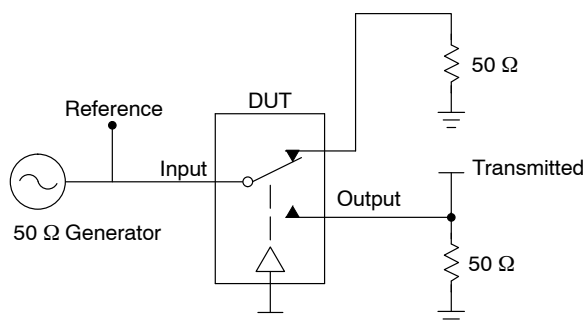

Figure 5. t_{ON}/t_{OFF}

Channel switch control/s test socket is normalized. Off isolation is measured across an off channel. On loss is the bandwidth of an On switch. V_{ISO} , Bandwidth and V_{ONL} are independent of the input signal direction.

$$V_{ISO} = \text{Off Channel Isolation} = 20 \log \left(\frac{V_{OUT}}{V_{IN}} \right) \text{ for } V_{IN} \text{ at } 100 \text{ kHz}$$

$$V_{ONL} = \text{On Channel Loss} = 20 \log \left(\frac{V_{OUT}}{V_{IN}} \right) \text{ for } V_{IN} \text{ at } 100 \text{ kHz to } 50 \text{ MHz}$$

Bandwidth (BW) = the frequency 3 dB below V_{ONL}

V_{CT} = Use V_{ISO} setup and test to all other switch analog input/outputs terminated with 50 Ω

Figure 6. Off Channel Isolation/On Channel Loss (BW)/Crosstalk (On Channel to Off Channel)/ V_{ONL}

DETAILED DESCRIPTION

High Speed (480Mbps) USB 2.0 Optimized

The NLAS7242 is a DPDT switch designed for USB applications within portable systems. The R_{ON} and C_{ON} of both switches are maintained at industry-leading low levels in order to ensure maximum signal integrity for USB 2.0 high speed data communication. The NLAS7242 switch can be used to switch between high speed (480Mbps) USB signals and a variety of audio or data signals such as full speed USB, UART or even a moderately resistive audio terminal.

Over Voltage Tolerant

The NLAS7242 features over voltage tolerant I/O protection on the common signal pins D+/D-. This allows the switch to interface directly with a USB connector. The D+/D- pins can withstand a short to V_{BUS} , up to 5.25 V, continuous DC current for up to 24 hours as specified in the USB 2.0 specification. This protection is achieved without the need for any external resistors or protection devices.
