SCES415F - NOVEMBER 2002 - REVISED SEPTEMBER 2003

- Available in the Texas Instruments NanoStar<sup>™</sup> and NanoFree<sup>™</sup> Packages
- Supports 5-V V<sub>CC</sub> Operation
- Inputs Accept Voltages to 5.5 V
- Max t<sub>pd</sub> of 6.3 ns at 3.3 V
- Low Power Consumption, 10-μA Max I<sub>CC</sub>
- ±24-mA Output Drive at 3.3 V
- I<sub>off</sub> Supports Partial-Power-Down Mode Operation
- Latch-Up Performance Exceeds 100 mA Per JESD 78, Class II
- ESD Protection Exceeds JESD 22
  - 2000-V Human-Body Model (A114-A)
  - 200-V Machine Model (A115-A)
  - 1000-V Charged-Device Model (C101)

#### description/ordering information

YEA, YEP, YZA, OR YZP PACKAGE (BOTTOM VIEW)

In0	03	40	Y
GND	02	50	Vcc
ln1	01	60	ln2

This configurable multiple-function gate is designed for 1.65-V to 5.5-V V<sub>CC</sub> operation.

The SN74LVC1G58 features configurable multiple functions. The output state is determined by eight patterns of 3-bit input. The user can choose the logic functions AND, OR, NAND, NOR, XOR, inverter, and noninverter. All inputs can be connected to  $V_{CC}$  or GND.

This device functions as an independent gate, but because of Schmitt action, it may have different input threshold levels for positive-going ( $V_{T+}$ ) and negative-going ( $V_{T-}$ ) signals.

NanoStar<sup>™</sup> and NanoFree<sup>™</sup> package technology is a major breakthrough in IC packaging concepts, using the die as the package.

#### ORDERING INFORMATION

TA	PACKAGE <sup>†</sup>		ORDERABLE PART NUMBER	TOP-SIDE MARKING <sup>‡</sup>
	NanoStar™ – WCSP (DSBGA) 0.17-mm Small Bump – YEA		SN74LVC1G58YEAR	
	NanoFree™ – WCSP (DSBGA) 0.17-mm Small Bump – YZA (Pb-free)	Tape and reel	SN74LVC1G58YZAR	CD
–40°C to 85°C	NanoStar™ – WCSP (DSBGA) 0.23-mm Large Bump – YEP		SN74LVC1G58YEPR	CP_
	NanoFree™ – WCSP (DSBGA) 0.23-mm Large Bump – YZP (Pb-free)		SN74LVC1G58YZPR	
	SOT (SOT-23) – DBV	Tape and reel	SN74LVC1G58DBVR	C58_
	SOT (SC-70) – DCK	Tape and reel	SN74LVC1G58DCKR	CP_

<sup>†</sup> Package drawings, standard packing quantities, thermal data, symbolization, and PCB design guidelines are available at www.ti.com/sc/package.

<sup>‡</sup>DBV/DCK: The actual top-side marking has one additional character that designates the assembly/test site.

YEA/YZA,YEP/YZP: The actual top-side marking has three preceding characters to denote year, month, and sequence code, and one following character to designate the assembly/test site. Pin 1 identifier indicates solder-bump composition  $(1 = \text{SnPb}, \bullet = \text{Pb-free})$ .

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

NanoStar and NanoFree are trademarks of Texas Instruments.

PRODUCTION DATA information is current as of publication date. Products conform to specifications per the terms of Texas Instruments standard warranty. Production processing does not necessarily include testing of all parameters.

SCES415F - NOVEMBER 2002 - REVISED SEPTEMBER 2003

#### description/ordering information (continued)

This device is fully specified for partial-power-down applications using  $I_{off}$ . The  $I_{off}$  circuitry disables the outputs, preventing damaging current backflow through the device when it is powered down.

FUNCTION TABLE							
	INPUTS	OUTPUT					
In2	In1	In0	Y

#### absolute maximum ratings over operating free-air temperature range (unless otherwise noted)<sup>†</sup>

Supply voltage range, V <sub>CC</sub> Input voltage range, V <sub>I</sub> (see Note 1) Voltage range applied to any output in the high-impedance or power-off state, V <sub>O</sub>	
(see Note 1)	–0.5 V to 6.5 V
Voltage range applied to any output in the high or low state, V <sub>O</sub>	
(see Notes 1 and 2)	–0.5 V to V <sub>CC</sub> + 0.5 V
Input clamp current, I <sub>IK</sub> (V <sub>I</sub> < 0)	
Output clamp current, I <sub>OK</sub> (V <sub>O</sub> < 0)	–50 mA
Continuous output current, I <sub>O</sub>	
Continuous current through V <sub>CC</sub> or GND	
Package thermal impedance, $\theta_{JA}$ (see Note 3): DBV package	
DCK package	
YEA/YZA package	143°C/W
YEP/YZP package	
Storage temperature range, T <sub>stg</sub>	

<sup>†</sup> Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

NOTES: 1. The input negative-voltage and output voltage ratings may be exceeded if the input and output current ratings are observed.

2. The value of V<sub>CC</sub> is provided in the recommended operating conditions table.

3. The package thermal impedance is calculated in accordance with JESD 51-7.

#### recommended operating conditions (see Note 4)

			MIN	MAX	UNIT	
Vaa	Supply voltage	Operating	1.65	5.5	V	
Vcc	Supply voltage	Data retention only			v	
VI	Input voltage		0	5.5	V	
VO	Output voltage		0	VCC	V	
		V <sub>CC</sub> = 1.65 V		-4		
I <sub>OH</sub> Hig	High-level output current	$V_{CC} = 2.3 V$		-8		
				-16	mA	
		V <sub>CC</sub> = 3 V		-24		
		$V_{CC} = 4.5 V$		-32		
		V <sub>CC</sub> = 1.65 V		4		
		$V_{CC} = 2.3 V$		8		
IOL	Low-level output current			16	mA	
		V <sub>CC</sub> = 3 V		24		
		$V_{CC} = 4.5 V$		32		
Τ <sub>Α</sub>	Operating free-air temperature		-40	85	°C	

NOTE 4: All unused inputs of the device must be held at V<sub>CC</sub> or GND to ensure proper device operation. Refer to the TI application report, *Implications of Slow or Floating CMOS Inputs*, literature number SCBA004.

SCES415F - NOVEMBER 2002 - REVISED SEPTEMBER 2003

			V <sub>CC</sub>		ΤΥΡ <sup>†</sup> ΜΑΧ	UNIT
V <sub>T+</sub>			1.65 V	0.79	1.16

#### PARAMETER MEASUREMENT INFORMATION

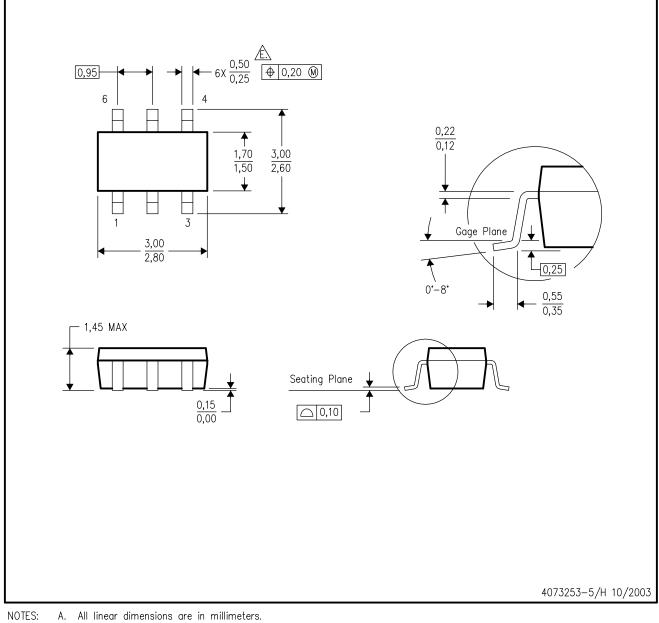

- B. Waveform 1 is for an output with internal conditions such that the output is low except when disabled by the output control. Waveform 2 is for an output with internal conditions such that the output is high except when disabled by the output control. C. All input pulses are supplied by generators having the following characteristics: PRR  $\leq$  10 MHz, Z<sub>Q</sub> = 50  $\Omega$ .
- D. The outputs are measured one at a time with one transition per measurement.
- E. tpLz and tpHz are the same as tdis.
- F. tpzL and tpzH are the same as ten.
- G. tPLH and tPHL are the same as tpd.
- H. All parameters and waveforms are not applicable to all devices.

DBV (R-PDSO-G6)

PLASTIC SMALL-OUTLINE PACKAGE

- Β. This drawing is subject to change without notice.
- Body dimensions do not include mold flash or protrusion.
- C. D. Leads 1,2,3 may be wider than leads 4,5,6 for package orientation.
- E Falls within JEDEC MO-178 Variation AB, except minimum lead width.

#### **IMPORTANT NOTICE**

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.
